Side cutters

10.2 cm | Side cutting edges

For shortening fine, soft wire and protruding wire ends on small components.

Item number	**10318**
GTIN	4260606871411

Warnings and safety information

Protect your eyes. Wear safety glasses when cutting. Secure the wire end and direct the cut away from people.

Risk of cuts and crushing. Hold the pliers only by the handles. Keep fingers away from the cutting edges and joint.

Protect the cutting edges. Do not cut spring wire, hardened steel or thick wire. Use the pliers only with intact, sharp cutting edges.

Risk of electric shock. Work only on de-energised parts. The handle covers provide no protection for live work.

Operation

Check the joint, handles and cutting edges before use. Use the pliers only if they move freely, are undamaged and have clean, dry handles.

1. **Secure the wire.** Support the workpiece securely. Hold the wire end to be cut off with a second pair of pliers so it cannot fly off when cut.
2. **Approach from the side.** Bring the open cutting edges to the cutting point from the side. Place the wire across the cutting edges.
3. **Cut the wire.** Close the handles evenly. Do not twist or tilt the pliers. Stop cutting if considerable force is needed to sever the wire.

Care and storage

Remove wire fragments with a brush. Wipe the pliers dry with a cloth and store them out of reach of children.
