Flat nose pliers

11.8 cm | Flat jaws

For holding small parts over a flat area and making angled bends in soft wire or thin tabs.

Item number	**10320**
GTIN	4260606871435

Warnings and safety information

Risk of slipping. Grip small parts with both jaws. If the part slips, open the pliers and reposition them.

Risk of crushing. Hold the pliers only by the handles. Keep fingers out of the space between the jaws and away from the joint.

Avoid overloading. Use hand pressure only. Stop if the workpiece moves only with heavy pressure. Do not use the pliers as a lever or hammer.

Risk of electric shock. Work only on de-energised parts. The handle covers provide no protection for live work.

Operation

Check the joint, handles and jaws before use. Use the pliers only if they move freely, are undamaged and have clean, dry handles.

1. **Position the workpiece.** Place as much of the part as possible flat between the jaws. For an angled bend, align the intended bend line with the jaw edge.
2. **Control the grip.** Close the handles until the part is held securely. For delicate surfaces, test the pressure needed on a scrap piece first.
3. **Form the bend.** Slowly guide the free end around the jaw edge. Open the pliers before removing or repositioning the part.

Care and storage

Wipe the pliers with a dry cloth after use. Store them in a dry place out of reach of children.
