Linsemann pliers

10.6 cm | Finely serrated jaws with cutter

For holding and aligning small workpieces, such as a piece of wire or a jewellery connector, and for cutting fine, soft wire.

Item number	**10322**	GTIN	4260606871459

⚠ Warnings and safety information

Protect your eyes. Wear safety glasses when cutting. Secure the wire end and direct the cut away from people.

Protect the cutter. Do not cut spring wire, hardened steel or thick wire. Use the pliers only with an intact, sharp cutter.

Risk of puncture injuries. Point free wire ends away from your body. Release the pliers if the workpiece slips, then reposition them.

Risk of crushing. Hold the pliers only by the handles. Keep fingers out of the space between the jaws and away from the joint.

Avoid overloading. Use hand pressure only. Stop if the workpiece moves only with heavy pressure. Do not use the pliers as a lever or hammer.

Risk of electric shock. Work only on de-energised parts. The handle covers provide no protection for live work.

Operation

Check the joint, handles, jaws and cutter before use. Use the pliers only if they move freely, are undamaged and have clean, dry handles.

1. **Choose the gripping point.** Place the serrated gripping surfaces on a stable part of the component. The serrations may mark soft or coated surfaces.
2. **Control the pressure.** Close the handles only enough to hold the part securely. For delicate surfaces, test the pressure on a scrap piece.
3. **Align the component.** Move the part into position with a small, controlled movement. Open the jaws before changing the gripping point.
4. **Cut the wire.** Place the wire across the cutter between the jaws and joint. Close the handles evenly without twisting or tilting the pliers. Stop cutting if considerable force is needed to sever the wire.

Care and storage

Remove wire fragments with a brush. After use, wipe the pliers with a dry cloth and store them in a dry place out of reach of children.
