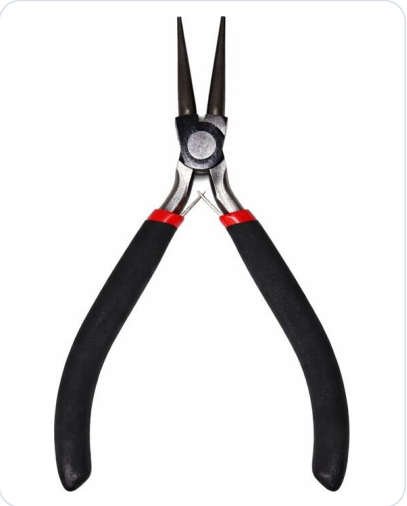
Round nose pliers

11.3 cm | Tapered round jaws

For forming eyes, loops and curves in fine, soft wire.



Item number	**10324**
GTIN	4260606871473

Warnings and safety information

Wire springing back. Bend soft wire only. Keep the free end under control and wear safety glasses if it could spring back.

Risk of crushing. Hold the pliers only by the handles. Keep fingers out of the space between the jaws and away from the joint.

Avoid overloading. Use hand pressure only. Stop if the workpiece moves only with heavy pressure. Do not use the pliers as a lever or hammer.

Risk of electric shock. Work only on de-energised parts. The handle covers provide no protection for live work.

Operation

Check the joint, handles and jaws before use. Use the pliers only if they move freely, are undamaged and have clean, dry handles.

1. **Choose the radius.** Place the wire between the round jaws near its end. Small eyes are formed near the tips; larger ones further back.
2. **Form the eye.** Hold the wire with light pressure. Slowly guide it around one round jaw. Point the free end away from your face.
3. **Complete the shape.** Open the pliers to regrip, then grip at the same position along the jaw for a uniform radius. Release the finished eye.

Care and storage

Wipe the pliers with a dry cloth after use. Store them in a dry place out of reach of children.
